Subject: Decision Analysis - Good news- Decision on DA-03-22-ART-0016.R1

20-Nov-2022

Dear Authors,

It is a pleasure to accept your manuscript entitled "Information Density in Decision Analysis" in (nearly) its current form for publication in Decision Analysis. Review comments are included at the foot of this letter. On behalf of the entire Editorial Board, we thank you and look forward to your continued contributions to Decision Analysis.

This acceptance is subject to you submitting a final file version of your paper with any needed edits to respond to the review comments. Please submit your final version within one week if possible. I would like to get it into production as soon as possible, so it can appear in Articles in Advance online and in the next available issue.

Here are the next steps:

1. You will find your manuscript here: <https://mc.manuscriptcentral.com/deca>. Go into your Author Center where you will see "Manuscripts Accepted for First Look." Under "Action" for this paper, click on "submit updated manuscript" and follow the steps as you would during a manuscript submission process. If you have any questions, please don't hesitate to contact Kelly Kophazi, Managing Editor, at kelly.kophazi@informs.org.
2. Read the reviews and make any final changes prompted by them. Please be sure to use our journal's references style, update citation information on any unpublished references, and cite appropriate references from our journal and other journals. For example, see the references from the March 2013 "From the Editors" column:
<http://pubsonline.informs.org/doi/pdf/10.1287/deca.1120.0262>
3. Upload the final version. Do not delete any old files when uploading your new files. Please include the word "FINAL" in the file name (i.e., paper_FINAL.doc). We need your final version source file (Microsoft Word or Latex format) and your final complete manuscript in PDF format (not the PDF generated by Scholar One, but a PDF generated by you).
4. In a few months, you will get the page proofs via email and will be asked to respond quickly with any corrections. When the proofs are complete, the paper may appear online in Articles in Advance, accessed via <http://pubsonline.informs.org/journal/deca/>.
5. One author must sign the attached Copyright Transfer Agreement. This signed form can be uploaded as PDF.
6. Complete and upload the attached Editorial Checklist. Do NOT upload as a PDF.

7. Figures submitted in color will be published in color in the online version of the journal without charge to the author (they will be in grayscale in the print version of the journal). Please ensure that captions reflect the grayscale publication of the paper (e.g., for Figures 1, 2, and 10). For color in the print version, the author is responsible for color printing fees and must pay the fees prior to publication. To request that figures be printed in color, complete and return the Editorial Checklist; in the File Notes section of the checklist, please note the figures for which you are requesting cost estimates.

8. We include author biographies at the end of published papers. Use the attached "Decision-Analysis-example-brief-author-bios.pdf" as a guide; bios should be limited to 500 characters. Please upload a biography for each author (this can be one document) with your final files.

9. You will be sent a PDF file version about a month after printing.

10. Authors may post their working papers on websites after acceptance and prior to publication, as long as the sites are not copyrighted and do not serve as formal depositories. More information about this policy is available from <http://pubsonline.informs.org/authorportal/rights-permissions>.

An optional MEDIA PROMOTION FORM is attached. This form helps INFORMS identify manuscripts for potential media promotion. If you decide to use it, please fill it out completely and send it directly to: Ashley Smith, INFORMS Public Affairs Coordinator, at asmith@informs.org.

Congratulations!

Sincerely,

Dr. Vicki Bier

Editor in Chief, Decision Analysis
